Environment and Biodiversity Committee meeting 25th November 2026

Item 10a – To consider providing the Thermal Imaging project this season

Background

Thermal imaging has been carried out over the past few years with numbers dwindling each year.

Last year Julian, Liz and Peter carried out imaging over three evenings of thirteen properties. Feedback from those residents who took up the offer of thermal imaging was very positive.

Next Steps

If we require the cameras this year we will need to reserve them as soon as possible. Consideration of publicity to make the scheme worthwhile will be needed.
