Open Space and Leisure Committee meeting 19th November 2025

Item 11 To consider the provision of totem pole type signage showing directions to the wildlife garden, play areas, and community facilities and to consider the design process, commissioning and funding.

At your last meeting there were no designs suggested for this information signposting however it was agreed that the provision of signage showing directions to the wildlife garden, play areas and community facilities would be a project that brings a unique feature to the village.

It was suggested that the design process could involve a community competition bringing residents together to produce a creative artwork incorporated into an information signpost.

Should you wish to progress this project consideration must be given to how such a competition should be launched, how it will be judged, what type of design is favourable, commissioning and ultimately funding of the project.

Recommendation

That consideration be given to how this project will be taken forward and the time needed to facilitate it.
